

Netpro has proven expertise in eDeveloper, the award-winning Rapid Application Development tool (RAD), from Magic Software Enterprises. eDeveloper enables us to work in a more time-efficient way, so changes and amendments can be made throughout the development and evolution of your system. It simply means that we can show you screens right from the start - so initial drafts can be quickly modified and your feedback can be rapidly integrated into the evolving system. On-going changes can be made until you are happy with the best solution.

MagNet, our unique proprietary migration tool and methodology provides automated conversion and migration from Magic eDeveloper to Microsoft .Net thus providing performance, scalability, usability and availability of resources for our client applications.

Our professionals have proficiency in architecting and deploying integrated technology solutions. We help deliver rapid return on investment by leveraging and extending our clients' existing IT investments, while providing them with the knowledge and tools to be the architects of their own technology strategies.
