URL: www.etsdevelopment.com

### **Background**

ETS Development Group LLC, a Service Disabled Veteran Owned Business (SDVO), is a law enforcement software and technology solutions provider serving the Public Safety Sector. ETS Development Group, LLC is focused on delivering law enforcement technology solutions that meet high standards.

### **Application Brief / Need**

This is a comprehensive real-time computer aided dispatch system. It tracks your calls, units and officers, and displays your call locations on a map. It works interactively with Access Data Corporation's full line of law enforcement software solutions. Complete name and criminal activity tracking is also available through the linked Sleuth records management, court and detention management modules. The modules involved in the project are:

- ◆ Call Registration and Tracking
- ◆ Map for locating caller
- ◆ Reports
- ◆ Data Export

### **Project Scope / Solution**

Agencies are facing challenges in law enforcement and public safety sector. These are mainly related to accuracy and efficiency. This application ensures that the agency can function safely and efficiently using technology designed to increase productivity, efficiency and bring your facility up to date with timely and accurate information.

### **Benefits / Value Proposition**

This system enables faster and accurate data access. It also facilitates different methods to locate the call, for e.g. Maps. The system generates statistical data using different reports.
