

## MICROSOFT TECHNOLOGY PRACTICE

**N**etpro Technologies is committed to enhancing its customers' success through implementation of cost competitive and quality software solutions. To aggressively compete and remain successful, enterprises often invest in custom applications and solutions. Building systems with modular, open, and flexible software will enable enterprises to more quickly adopt and implement changes and not limit their vision.

Netpro addresses this need of enterprises by architecting, integrating mission-critical, scalable applications linking Microsoft platforms thus delivering seamless end-to-end solutions.

Being **Microsoft Gold Partners**, we have depth of technical expertise and skills on the Microsoft .Net platform. Leveraging the .Net framework, we are uniquely qualified to develop and deliver solutions for the next generation Internet. We ensure tight integration with existing systems and increase in reliability & scalability thus ascertaining low cost of ownership.

We also have partnership in the **Microsoft NXT program** which assists ISV's that migrate to the Microsoft platform. The program makes the migration process easier and more cost effective by connecting ISV's with experienced delivery partners; and providing incentives for qualified ISV's in terms of complimentary training, technical support and services, software licenses, and cross platform-ing support.

### OFFERINGS

- ◆ Bespoke Application Engineering and Development
- ◆ Re-engineering and Migration
- ◆ Maintenance and Support
- ◆ Deployment and Implementation
- ◆ Testing and Documentation
- ◆ Design and Development of enterprise portals and web-based applications

### KEY DIFFERENTIATORS

- ◆ Established track record of successfully executing large number of diverse projects over the years
- ◆ Proven Offshoring Delivery Framework
- ◆ Priority based delivery of critical functionality
- ◆ Competitive pricing

### TECHNOLOGY COMPETENCIES

Focus Area	Skill Sets
<b>Database</b>	Microsoft SQL Server 2005 and 2000
<b>Data warehousing and reporting</b>	Microsoft SQL Server Analysis and Reporting Services 2005, Office Performance Point Server 2007 and Microsoft Office for client side components
<b>Middle Ware</b>	Microsoft BizTalk 2002, .NET Web Services and Microsoft Host Integration Server
<b>Mobile Computing</b>	PocketPC 2002, Windows CE, SQL Server CE, Microsoft Mobile Internet Toolkit, .Net Compact Framework, Pocket PC SDK 2002, Embedded Visual Tools and Smart Phone SDK 2002
<b>Development tools and Languages/ Technologies</b>	Visual Studio.NET - .Net Framework, Visual Basic.NET, Visual C++.NET, Visual C#.NET, XML, ASP.NET, MTS, COM+, XML Web Services, SOAP, WSDL, UDDI and Embedded Tools, Commerce Server 2000 and Site Server

### SELECT PROJECT EXPERIENCE

- ◆ Integrated Clinical Information System: healthcare information technology and management
- ◆ Agent Portal: associates Business Performance Management, Sales and CRM
- ◆ Computer Aided Dispatch: law enforcement software and technology solutions
- ◆ Test Evaluation and Management Application: to review the language translation for exams
- ◆ Contact Management System: calling management application for call centre
- ◆ Enterprise Resource Planning: MS Dynamic Navision based Business Management Solution
