Background

New Era Solutions is a leading developer of providing solutions to companies who have chain of agents. These solutions not only increase the efficiency and productivity of agents but also give a detailed report to the company.

Application Brief / Need

AGENT Portal is a web based application that works around the 'Agents'. The Agents can check their own sale, residuals, commission payout and view top merchants on this site using their ID and credentials.

Project Scope / Solution

Some of the key features of the site are as follows:

- The users can view and download documents from different categories.
- Allows users to update their profile.
- RSS feeds are used for the environmental information.
- Dashboard detailing various reports.
- Shows latest news on a particular topic.
- Facility to contact the customer service of the company.
- Users can sign up as company agents.
- ♦ Gives information about significant events.

Benefits / Value Proposition

It allows the agents to view their Residuals and Commission payouts and view analysis reports of their top-ranking merchants' data. It also permits them to update their profiles within the OVL space and download detailed statement.
